"A volume the utility of which has been proved by experience."—*Western Morning News*, 28th March, 1913.

This book is the most complete work which has ever been published in English, and indeed probably in any language, giving the various Customs Tariffs in force throughout the World.

By the use of the Index, Exporters are enabled to see at a glance what duty, if any, is levied on any article imported into any country.

Tables of Foreign Moneys, Weights and Measures, with their English equivalents, are given.

H.B.M.'s Consuls in all parts of the World have in their annual reports to the Foreign Office, repeatedly pointed out the importance to British Manufacturers of making their communications with prospective customers in the language of those with whom they wish to establish business relations. The tariffs have therefore been arranged so as to show the weights and measures and the duty on each article in the currency of the different countries.
